Category	Question
AWS	What is an S3 in AWS and how did you use it for your project?
AWS AWS	What is cloud computing?
C++	Are you familiar with AWS? What are the 4 pillars of C++? (I think he ask for C++ because along with the Revature projects, I also described some of the ones I did for my school)
CI/CD	Have you used Jenkins?
CI/CD	What if I had the main codebase written by another team, and I wanted to make sure all the tests passed before deploying the application, what should I do?
CI/CD	What is Jenkins
CI/CD	How do you automate builds on a specific schedule (eg. every Friday)?
CI/CD	How can you resolve a merge conflict?
Coding	Write a function to capitalize the first letter of words, in Python and Java. Explain your code
Coding	Write a method to reverse a string.
Coding	Write a java function that checks whether a String is a palindrome?
Coding	Write a Python function that prints the length of a string
Coding	Write a python function that prints out each word in a string and the number of occurrences in a string.
Coding	Find the duplicate characters in the String "interrrvieew"
Coding	Given two integer variables, how would you reverse their values without using an intermediate variable?
Coding	How would you implement a fibonacci series?
Coding	Given two date Strings, how would you calculate the number of days between them?
	Using your professed IDE, write the colonium code for the following:
	Using your preferred IDE, write the selenium code for the following: 1. Write how you would create a chrome driver object.
	2.Write how you would input values in selenium(ex: username,password)
	3.write how you would click a button in selenium
Coding	4.assuming that your test case skips entering the username/password and tries to click on the login button, how do you capture the error message using selenium
	Given the following, write a method to count the number of IDs in the string
Coding	String employeeID="ID1, ID2, ID2, ID3, ID4, ID5, ID6";
Coding	Write a query to Select the employee record where the employee has the max salaray from the employee table.
Coding	Write a query to return the average of the salaries from the Employee table
Cucumber	What is Cucumber?
Cucumber	How do we connect steps with features?
Cucumber	How do you specify one feature file or many?
Cucumber	Let's say we have a Scenario Outline that logs in a user.
Cucumber	Let's say there is a step: @When("User logs out of the application"). How do we make the step definition for this generic so that it works when used with @Given and @Then too?
DevOps	What is DevOps (in general)?
General	Tell me about yourself?
General	How many years do you have expriance in Automation Testing
General	What IDEs have you used?
General General	Tell me about your self, your education/training, your technical track before this training and what've done in this training, any work experience that is technically related. Do you have prior experience in Java or Python before Revature?
General	Why do you want to do software testing?
General	Do you prefer Java or Python - are you strong in both?
General	What technologies did you cover during your training?
General	Asked what I felt strongest about in the curriculum.
General	Application Developers compared to Software Engineers
General	Where do you see yourself in 5 years? 10 years?
General	What is your preferred language (Java vs Python)
General	Have you used Cypress?
General	What type of testing do you prefer?
General	Are you ok with doing manual testing?
General	What is the best trait for a QA Engineer?
General	What is some debugging software that you used?
General	What kinds of bug reporting tools have you used?
General	What code management tools are you familiar with?
General General	How would you learn something new? How do you set goals?
General	What are good qualities of a leader?
General	How would you go about learning a new technology within a deadline?
General	What would you do if an application went down?
General	How would you handle conflict with a co-worker?
General	Are you willing to work after hours?
Gherkin	What is Gherkin
Gherkin	List some Keywords of Gherkin
Gherkin	Give an example of gherkin syntax for a chat feature
Gherkin	Show me an example of Gherkin syntax. Create a step for me.
Gherkin	Provide 3 examples of a positive and negatives tests for a login feature in Gherkin syntax
Git	Have you used Git?
Git	Let's say I have two developers who want to push up code at the same time. What commands will they use?
Git	What is the command to check if a file is not staged?
Git	How do you setup a new branch? What are instance and static variables in law?
Java	What are instance and static variables in Java? Why do we need static variables in Java?
Java Java	Why do we need static variables in Java? Can you change a string? If I want to change a string, what should I do?
Java	The difference between throw, throws, and throwable
Java	What are collections? Can you give me examples of collections, besides Array?
Java	What's the difference between an Array and an ArrayList?
Java	Describe the static keyword
Java	How does the JVM decide what to run when running a java application?
Java	Can there be more than 1 'main' function?
Java	When to use an abstract class over an interface.
Java	Can one class access another classes static variables.

Java Java	
Java	What are different list implementation? Which one did you use and why?
	Difference between list and tuple?
Java	Main difference between List and Map
Java	What type of collections have you used in Java?
Java	Compare and contrast the 3 types of maps in Java (HashMap, TreeMap, LinkedHashMap).
Java	What is the parent of all classes in Java?
Java	What are some methods of the Object class?
Java	What is Maven?
Java	How do you rate yourself in Java?
Java	What are datatypes?
Java	What are 3 ways to add an item to an array?
Java	What are 3 ways to remove an item from an array
Java	How would you debug an ElementNotFoundException?
Java	What are pointers?
Java	What is the best feature of Java?
Java	What are different data structure types available in Java? (eg. Lists, Sets, Maps, etc.)
Java	What are primitives in Java?
Java	What is the difference between ArrayList and LinkedList?
Java	Write a program to overload a method
Java	What are Strings?
Java	Explain these String methods (contains, index, substring)
Java	What is synchronization?
Java	Which collection allows duplicates? What is a default constructor?
Java	What is a default constructor? What are the different scopes in Java
Java	
Java	What is the difference between continue and break?
Java	What is the difference between final, finally, and finalize?
Java	How do you handle exceptions?
Java	Can you change a static variable?
Java	What are the different access modifiers in Java?
Java	Is it best practice to make everything public?
Java	How can you create a custom exception?
Java	How can you handle multiple exceptions?
Java	What is multi-threading?
Java	How do you implement inheritance in Java?
Java	What is the difference between an inner class and a subclass?
Java	How can you make a class non-inheritable?
Java	Give some examples of static methods.
Java	What is the difference between an abstract class and an interface?
Java	What is a StringBuffer?
	What is the output of the following:
	String s = new String["firstname"];
Java	s.concat("lastname");
Java	Explain what an interface is by giving a real-world example.
Java	What is a Wrapper class. What features are available to convert objects?
Java	What are the benefits of an abstract class?
Java	What does it mean to be 'platform independent'?
Java	How do you create an abstract class?
Java	What is an assert method?
Java	What is a class/object?
	What is a class/object? Does Java support multiple inheritance?
Java	
Java Java JavaScript JDBC	Does Java support multiple inheritance?
Java Java JavaScript	Does Java support multiple inheritance? What is the use of Promises in JavaScript?
Java Java JavaScript JDBC	Does Java support multiple inheritance? What is the use of Promises in JavaScript? How do you start using JDBC?
Java Java JavaScript JDBC JDBC	Does Java support multiple inheritance? What is the use of Promises in JavaScript? How do you start using JDBC? What are the parameters required to connect to a database (JDBC)?
Java JavaScript JDBC JDBC Jenkins	Does Java support multiple inheritance? What is the use of Promises in JavaScript? How do you start using JDBC? What are the parameters required to connect to a database (JDBC)? How do you start Jenkins (git command)?
Java Java JavaScript JDBC JDBC Jenkins Linux	Does Java support multiple inheritance? What is the use of Promises in JavaScript? How do you start using JDBC? What are the parameters required to connect to a database (JDBC)? How do you start Jenkins (git command)? List any Linux commands that you know
Java Java JavaScript JDBC JDBC Jenkins Linux Maven	Does Java support multiple inheritance? What is the use of Promises in JavaScript? How do you start using JDBC? What are the parameters required to connect to a database (JDBC)? How do you start Jenkins (git command)? List any Linux commands that you know What is a Parent pom.xml vs a child pom.xml?
Java Java JavaScript JDBC JDBC JDBC Linux Maven Maven	Does Java support multiple inheritance? What is the use of Promises in JavaScript? How do you start using JDBC? What are the parameters required to connect to a database (JDBC)? How do you start Jenkins (git command)? List any Linux commands that you know What is a Parent pom.xml vs a child pom.xml? What is the Maven lifecycle?
Java Java JavaScript JDBC JDBC Jenkins Linux Maven Maven Maven	Does Java support multiple inheritance? What is the use of Promises in JavaScript? How do you start using JDBC? What are the parameters required to connect to a database (JDBC)? How do you start Jenkins (git command)? List any Linux commands that you know What is a Parent pom.xml vs a child pom.xml? What is the Maven lifecycle? What are the main parts of a pom.xml?
Java Java JavaScript JDBC JDBC Jenkins Linux Maven Maven Maven NoSQL	Does Java support multiple inheritance? What is the use of Promises in JavaScript? How do you start using JDBC? What are the parameters required to connect to a database (JDBC)? How do you start Jenkins (git command)? List any Linux commands that you know What is a Parent pom.xml vs a child pom.xml? What is the Maven lifecycle? What are the main parts of a pom.xml? What did you use to connect your application to a database?
Java Java Java JavaScript JDBC JDBC Jenkins Linux Maven Maven Maven NoSQL OOP	Does Java support multiple inheritance? What is the use of Promises in JavaScript? How do you start using JDBC? What are the parameters required to connect to a database (JDBC)? How do you start Jenkins (git command)? List any Linux commands that you know What is a Parent pom.xml vs a child pom.xml? What is the Maven lifecycle? What are the main parts of a pom.xml? What did you use to connect your application to a database? What is encapsulation?

How do you select all entries that start with the letter 'J' in a table? How do you remove duplicate values in a query? How do you find the max of a column of int(s)? Are you familiar with Oracle DB? What is TCL? General how to write e2e tests. If there were 100 manual tests, how would you determine which test we could automate and which not? What is STLC?
\$QL \$QL \$QL \$QL \$QL \$QL \$QL \$QL \$QL \$QL	What is the difference between delete, truncate, and drop? How can you retrieve the first 20 rows of a query? How do you sort a query result? How do you write an index statement? What is a self join? What is a self join? What is the difference between DML and DDL? How do you select all entries that start with the letter 'J' in a table? How do you remove duplicate values in a query? How do you find the max of a column of int(s)? Are you familiar with Oracle DB? What is TCL? General how to write e2e tests. If there were 100 manual tests, how would you determine which test we could automate and which not? What is STLC? What types of tests are there
SQL Testing Testing Testing Testing Testing Testing Testing	What is the difference between delete, truncate, and drop? How can you retrieve the first 20 rows of a query? How do you sort a query result? How do you write an index statement? What is a self join? What are stored procedures? What is the difference between DML and DDL? How do you select all entries that start with the letter 'J' in a table? How do you select all entries that start with the letter 'J' in a table? How do you find the max of a column of int(s)? Are you familiar with Oracle DB? What is TCL? General how to write e2e tests. If there were 100 manual tests, how would you determine which test we could automate and which not? What is STLC? What is STLC? What is the difference between functional and non-functional testing
SQL	What is the difference between delete, truncate, and drop? How can you retrieve the first 20 rows of a query? How do you sort a query result? How do you write an index statement? What is a self join? What is a self join? What are stored procedures? What is the difference between DML and DDL? How do you select all entries that start with the letter 'J' in a table? How do you remove duplicate values in a query? How do you find the max of a column of int(s)? Are you familiar with Oracle DB? What is TCL? General how to write e2e tests. If there were 100 manual tests, how would you determine which test we could automate and which not? What is STLC? What types of tests are there What is the difference between functional and non-functional testing What testing frameworks did you use in Java and Python?
SQL Testing	What is the difference between delete, truncate, and drop? How can you retrieve the first 20 rows of a query? How do you sort a query result? How do you write an index statement? What is a self join? What are stored procedures? What is the difference between DML and DDL? How do you select all entries that start with the letter 'J' in a table? How do you remove duplicate values in a query? How do you find the max of a column of int(s)? Are you familiar with Oracle DB? What is TCL? General how to write e2e tests. If there were 100 manual tests, how would you determine which test we could automate and which not? What is STLC? What types of tests are there What is the difference between functional and non-functional testing What testing frameworks did you use in Java and Python? Who is responsible for running tests?
SQL Testing Testing Testing Testing Testing Testing Testing Testing Testing	What is the difference between delete, truncate, and drop? How can you retrieve the first 20 rows of a query? How do you sort a query result? How do you write an index statement? What is a self join? What are stored procedures? What is the difference between DML and DDL? How do you select all entries that start with the letter 'J' in a table? How do you remove duplicate values in a query? How do you find the max of a column of int(s)? Are you familiar with Oracle DB? What is TCL? General how to write e2e tests. If there were 100 manual tests, how would you determine which test we could automate and which not? What is STLC? What types of tests are there What is the difference between functional and non-functional testing What testing frameworks did you use in Java and Python? Who is responsible for running tests? How do you determine 'quality'?
SQL Festing Testing	What is the difference between delete, truncate, and drop? How can you retrieve the first 20 rows of a query? How do you sort a query result? How do you write an index statement? What is a self join? What are stored procedures? What are stored procedures? What is the difference between DML and DDL? How do you select all entries that start with the letter 'J' in a table? How do you remove duplicate values in a query? How do you find the max of a column of int(s)? Are you familiar with Oracle DB? What is TCL? General how to write e2e tests. If there were 100 manual tests, how would you determine which test we could automate and which not? What is STLC? What types of tests are there What is the difference between functional and non-functional testing What testing frameworks did you use in Java and Python? Who is responsible for running tests? How do you determine 'quality'? What is important about automation testing?
SQL SQL	What is the difference between delete, truncate, and drop? How can you retrieve the first 20 rows of a query? How do you sort a query result? How do you write an index statement? What is a self join? What are stored procedures? What is the difference between DML and DDL? How do you select all entries that start with the letter 'J' in a table? How do you find the max of a column of int(s)? Are you familiar with Oracle DB? What is TCL? General how to write e2e tests. If there were 100 manual tests, how would you determine which test we could automate and which not? What is STLC? What is STLC? What is fest are there What is the difference between functional and non-functional testing Whot is responsible for running tests? How do you determine 'quality'? What is important about automation testing? Contrast Automatic versus Manual testing
SQL Testing	What is the difference between delete, truncate, and drop? How can you retrieve the first 20 rows of a query? How do you sort a query result? How do you write an index statement? What is a self join? What are stored procedures? What is the difference between DML and DDL? How do you select all entries that start with the letter 'J' in a table? How do you remove duplicate values in a query? How do you remove duplicate values in a query? How do you find the max of a column of int(s)? Are you familiar with Oracle DB? What is TCL? General how to write e2e tests. If there were 100 manual tests, how would you determine which test we could automate and which not? What is STLC? What is STLC? What is the difference between functional and non-functional testing What testing frameworks did you use in Java and Python? Who is responsible for running tests? How do you determine 'quality'? What is important about automation testing? Contrast Automatic versus Manual testing Explain the different levels of software testing (Unit, Integration, E2E)
SQL SQL	What is the difference between delete, truncate, and drop? How can you retrieve the first 20 rows of a query? How do you sort a query result? How do you write an index statement? What is a self join? What are stored procedures? What is the difference between DML and DDL? How do you select all entries that start with the letter 'J' in a table? Testing	Describe the lifewale of text automation
	Describe the lifecycle of test automation.
Testing	How do debug?
Testing	Explain Regression testing.
Testing	Have you written any Test Strategy and Test Reports before? Can you tell me what goes in those reports?
Testing	What do you normally document in a Test Case? What is a RTM (Requirements Traceability Matrix?
Testing	What frameworks are available for testing?
Testing	What browsers did you test your application on? Did you have any cross-browser compatibility issues?
Testing	What is structured data? What is unstructured data
Testing	What kinds of tests would you perform before deployment?
Testing	What is BDD?
Testing	What is STLC?
Testing	Who takes care of unit tests?
Testing	What is a defect?
Testing	What is static testing?
Testing	What is the difference between system testing and UAT Testing?
Testing	What is the difference between a defect's priority rating and severity rating?
Testing	What is the defect lifecycle?
	In API Testing, what types of routes are used?
Testing	What do you do if your supervisor doesn't want the team to work on a bug right away?
Testing	What is the difference between a test plan and a test strategy?
Testing	How did you use TestNG in your project and how did you document your test?
Testing	What is the difference between a scenario and a scenario outline?
Testing	What tests would you write for a Gmail login feature?
Testing	What is the difference between TDD and BDD?
Testing	What types of cross-browser testing have you performed?
Testing	What is UAT?
Testing	How do you determine time requirements for clients?
Testing	Why do you use a traceability matrix?
Testing	What is the difference between Validation testing vs Verification Testing?
Testing	How do you log a defect?
Testing	What are the levels of the testing pyramid?
TestNG	TestNG, Let's say we have all the test cases on a single file. How could we only run a group of specific tests? For example, only run tests related to one of the DAO.
TestNG	What is TestNG
TestNG	Can you explain to me what testNG is?
TestNG	If you want to do regression testing for testNG, where do you specify which tests to run?
TestNG	How do you skip a test in TestNG?
TestNG	What is a test priorty?
XPath	Find the relative xpath of these web elements.
XPath	Describe XPath. What is it?
XPath	Explain how to write an XPath with unique properties
XPath	What is "//"
XPath	How would you find something if the path of it changes (eg. by id but using XPath)
XPath	What is the difference between using an ID selector vs XPath?
XPath	Write an example of XPath
XPath	What is the difference between a full XPath and a Relative XPath?
•
